

Super Antenna Systems

SAS™

The performance of Super Antenna Systems (SAS) redefines everything mobile networks are capable of. Every component has been designed to maximize performance and energy efficiency. SAS isn't just better coverage, higher capacity, and faster data rates. It sets a whole new frontier.

The SAS antenna contains no electronics, they are 100% passive. All parts are made from aircraft graded aluminium, high precision manufactured according to highest standards.

- Future proof; 4G MIMO4-8 and 5G
- Previous mobile standards 3G, 2G, CDMA, FDD, TDD
- Up to 144 Gbit/s site capacity over 1,600 km².
- 18-sectors, MIMO8 each with 256 dipoles
- 690-2,700 MHz support for all bands and operators
- Up to 30 dBi antenna gain
