

Supercharge your network

SAS™ Upgrade

Supercharge the network by upgrading existing sites with more powerful antennas and instantly get significant improvements. With Radio Innovation's new antenna upgrades, standard sites will increase coverage up to 10 times or site traffic capacity multiplied by 6-18 times.

SAS Upgrades are available with 4, 2 or 1 floor around existing towers

- Up to 10,8 Gbit/s site capacity
- 18-sectors each with 256 dipoles
- 690-2,700 MHz support for all bands
- Up to 30 dBi antenna gain
- Supports up to 432 RRHs per site
